Custom sizes to fit any need

REAR HITCH

Bolt-on rear hitch

BENEFITS

Exclusive to Tuff Truck

- Superior quality and durability from fully welded aluminum compared to our competitors' lower quality welded versions
- Weight is further reduced by the crossmemberless design
- The underside doesn't collect road and job site debris because of the crossmemberless design
- Mounting height is reduced by 4", which means a lower center of gravity and installed bed height due to crossmemberless design
- Added frame protection plus reduced vibration and noise because of the proprietary EX2 long sill rubber cushion insert
- Removable front, sides and rear is great for snow removal companies
- Reduced fuel costs from bodies that weigh 50% less than steel
